PROFESSIONAL SUMMARY

Full Stack Engineer specializing in scalable web applications, real-time systems, and industrial dashboards. Delivered 10+ production systems across manufacturing clients with expertise in system design, pub/sub architectures, and cloud deployments.

TECHNICAL SKILLS

Languages:	JavaScript, TypeScript, Python, C++, SQL
Frontend:	React.js, Next.js, HTML, CSS, Tailwind
Backend:	Node.js, Express.js, Flask
Databases:	MySQL, MongoDB
Systems & Tools:	NATS, Redis, ROS, Docker
Cloud:	Microsoft Azure(App Services, Azure VM, Static Web Apps Service), AWS (EC2, S3)
Concepts:	System Design, REST APIs, Pubisher/Subscriber message service, RBAC, Performance Optimization, VAPT

EXPERIENCE

Full Stack Developer – 1 | Eternal Robotics, Hyderabad *Jul 2024 – Present*

- Built and deployed scalable dashboard platforms processing 8,000+ daily inspection records with real-time analytics.
- Delivered 10+ production projects and on-site deployments across manufacturing clients using Docker.
- Migrated system communication from ROS → NATS, improving throughput and reducing latency in real-time pipelines.
- Implemented event-driven pub/sub systems using NATS, ROS, and Redis for high-frequency data processing.
- Optimized backend performance via query rewriting and indexing, significantly reducing dashboard load times.
- Implemented Active Directory (LDAP) authentication, RBAC, shift analytics, and automated alerts.
- Led a team of 2 engineers, conducting code reviews and mentoring; ensured security via VAPT testing.

Full Stack Developer Intern | Eternal Robotics, Hyderabad *Jun 2023 – Jun 2024*

- Designed and deployed industrial dashboard applications with real-time monitoring using React and Node.js with REST APIs.
- Contributed to core architecture, feature development, and deployment of internal company platforms (hypervise.ai, CSAT).

PROJECTS

AI-Based Healthcare System — *github.com/Supriya-1432/major_project*

- Built a ResNet50-based deep learning model detecting COVID-19, pneumonia, and TB with ~93% test accuracy.
- Developed a full-stack pipeline using React, Node.js, and MongoDB with integrated web-based prediction.

Language Translator — *github.com/Supriya-1432/Language-Translator*

- Developed a Node.js + Python system using LLM APIs (Groq/Ollama) with a real-time multilingual web dashboard.

Freelance Educational Platform — *github.com/indexty-in/educatsy-supriya*

- Building a scalable Next.js + TypeScript application focused on performance optimization and reusable UI architecture.

EDUCATION

B.Tech in Computer Science | Vignan's Institute of Information Technology *2020 – 2024* | *GPA: 9.11 / 10*

ACHIEVEMENTS

- Solved 190+ problems on LeetCode; CodeChef Certified in Data Structures & Algorithms.
- Strong track record in production deployments, system debugging, and performance tuning across industrial environments.
- Experience working in client-facing production environments

KEY STRENGTHS

- End-to-end ownership (Design → Development → Deployment)
- Real-time systems & event-driven architecture
- Performance optimization & debugging
- Team leadership & collaboration
